About Us

Contela has accumulated commercial experience in the telecommunication industry with CDMA/WCDMA/LTE products for global telecom operators since the establishment in 2000. With professional experience and know-how through commercial service for 3G and LTE Small Cells, Contela has been a leading provider with Residential/Enterprise/Outdoor Small Cells and its gateway and management system. Since Contela expanded its small cell market to the U.S., it has been a competent supplier until today. Contela also has been contributing our effort and commercial experience to the IoT platform, including M2M. Contela continuously thrives on expanding the reliable wireless network service with our advanced technology in the IoT era with the LoRa network solution.

Company Info
- Date of Foundation: 2000.03.23
- Product Category: 5G, IoT, LTE, M2M
- Homepage: http://www.contela.com
- Address: 33/4th floor, Seokwojae Building, 9-9, Seongnam-daero 331-beon-gil, Bundang-gu, Seongnam-si, Gyeonggi-do 13558, Republic of Korea
- Main contact person: June Park / Manager / Global Business Division
  Tel: +82-10-3020-9130
  Email: june.p@contela.com
  whatsapp & wechat: +82-10-3020-9130

Our Clients
Verizon Wireless, SK Telecom, Samsung, Ericsson, KDDI, HITACHI

Target Regions
USA, Japan, Europe, India, Middle East(UAE, Turkey), Southeast Asia(Vietnam)

Our Specialty
Enhanced End-to-End Wireless Solution

Main Products

01 5G Small Cell Solution
The private 5G core solution of ours has reached the development stage for proof of concept for the first time in Korea. Its commercialization will occur in the nearest future as we are duly developing 5G small cell cooperated with SK Telecom and ETRI, planning to complete by the end of next year. With our successful deployment of the 3G/LTE small cell solution, we will do another preoccupancy in the market of 5G.

02 Layer Split Hub-5G
LSH is a 5G hub device that connects DU with multi-RU, which plays a core role in expanding carriers’ in-building coverage. The current stage of the LSH market in Korea is at the beginning phase, where the carriers are applying it for themselves for the first time. It expects to expand its customer pool abroad next year, holding high potential for rapid growth. As Contela is one of the three companies with this technology in Korea, we have a competitive advantage.

03 LoRa Network Solution
Delivering IoT solution, Contela offers LoRa network solution, including LoRa Gateway and Network Server, and various service items that give new value and convenience to both individual and enterprise customers over the IoT network. LoRa is the network used for transmitting the small unit data with low speed in and out of 15km as described as Long Range. It is utilized for various usages of transportation, streetlamp, parking, smart appliance, industrial purposes, and more.

04 LTE Small Cell Solution
The technology of the virtualized EPC of Contela is at the highest level by having all the core network nodes. We also have the device for access network, which completes our competitiveness of small cell solutions in and outside the country. With our technology, we have successfully commercialized and supplied the small cell to the markets of the U.S., Korea and Japan since the early 2000s.
